

NU HORIZON GENETICS

MANAGEMENT CONSIDERATIONS

■ Irrigated ■ Dryland ■ Both

Specifically developed for central and eastern Nebraska and neighboring states, this variety offers a robust disease resistance package tailored to the region.

Achieve protection and yield potential with a timely fungicide application at flowering to guard against fusarium head blight.

Siege

Test Weight and Protein Leader

- **Impressive yield** potential paired with excellent test weight, protein and large seed size
- **Strong winter hardiness** makes it a top choice for both grain production and cover crop use
- **Solid disease resistance**, including reliable protection against bacterial leaf streak
