

Freeman

A medium maturity and medium height variety well adapted to rainfed conditions in west-central and panhandle of Nebraska and surrounding areas.

Freeman offers competitive yield performance to other varieties in this area based on past multi-year Nebraska state variety trials.

U.S. Protected Variety (PVPA 1994).

Freeman can only be sold as a class of certified seed.

Overland

A medium-late maturity and medium-tall variety that performs well in portions of west-central and south-central Nebraska.

It is well known for its moderate resistance to Fusarium head blight and leaf rust. It has good straw strength for its height and very good winter hardiness.

U.S. Protected Variety (PVPA 1994). Overland can only be sold as a class of certified seed.

Goodstreak

A medium maturity and tall variety with a medium-long coleoptile that is popular as a hay/forage variety option in the Nebraska Panhandle and nearby areas.

Goodstreak has very good grain protein and fair standability for a tall variety. Goodstreak yields similarly to Pronghorn based on past state yield trials.

Please contact Nu Horizon Genetics for additional agronomic trait ratings and disease/pest ratings on these varieties. Seed availability is limited or not currently available for varieties Infinity CL, Panhandle, and Wesley through our Nu Horizon Genetics member network.
