

NT Pronto

Early Maturity Forage & Cover Crop

- **Unique early maturity**, harvest forage or hay 4-7 days ahead of NT11428 and 10-16 days ahead of NE96T441.

- **Excellent choice for cover crops**, offers strong early vigor, spring biomass, effective weed suppression, and timely maturity for rolling.

- **Best suited for central Nebraska and east into the Corn Belt** unless under irrigation

- **Moderate resistance** to bacterial leaf streak for added disease protection.

NT11428

Proven and Consistent

- **Exceptionally stable under stress**, with strong fall growth for dependable establishment.

- **High-quality forage**, good leaf-to-stem ratio, excellent standability, and strong overall feed value.

- **Earlier maturity advantage**, a few days ahead of NT13443 and about a week earlier than NE96T441.

- **Broadly adapted** across a wide range of environments.

- **Best grain options** in our lineup for yield and grain quality.

- **Strong disease package**, with solid resistance to leaf, stripe and stem rusts as well as ergot.

VARIETY RATINGS

Maturity	Early

NT13443*High Yield Leader***NE96T441***Tall, Late and Robust*

- **Forage yield leader** across central and eastern Nebraska and Kansas
- **High-performance**, management-responsive variety. Thrives under favorable conditions with excellent forage quality.
- **Limited fall growth, but breaks dormancy early** and delivers rapid spring growth.
- **Strong grain potential**, up to 50% higher yield than NE96T441
- **Solid disease resistance** to leaf, stripe, and stem rusts as well as ergot.

- **Strong establishment** and fall growth, ideal for fall or winter grazing when needed.
- **Impressive tonnage** potential with coarser stems when fully headed. Tall, late-maturing variety built for volume.
- **Trusted and proven**, the longest-standing variety in our lineup, still widely used for its reliability and consistent performance.
